

Max Steinhauser

Mechanical Engineering | Aerospace Certificate | University of Georgia
Powder Springs, GA | maxsteinhausers@gmail.com | 770-241-8123 | [LinkedIn](#)

SUMMARY

UGA Mechanical Engineering student with an Aerospace Certificate and a track record of hands-on production engineering. Experienced in CAD-driven design-to-manufacturing, dimensional quality control, and cost-reduction engineering. Targeting aerospace and automotive internships where technical ownership and real production impact matter.

EDUCATION

University of Georgia | Athens, GA

B.S. Mechanical Engineering, Aerospace Engineering Certificate — GPA: 3.55 | Expected May 2028

- Relevant Coursework: Engineering Statics, Dynamics, Strength of Materials, Numerical Methods, Differential Equations, Linear Algebra, Engineering Graphics Design

ENGINEERING EXPERIENCE

Manufacturing Engineer Intern | May 2026 – Aug 2026

[Metromont](#) | Hiram, GA [Portfolio Page](#)

- Designed a replacement concrete form component in Autodesk Inventor under a 1-hour production deadline; model passed manager review and was released directly to manufacturing
- Developing an in-house fabrication tool to replace a \$30,000 third-party solution at an estimated \$5,000 — a projected 83% cost reduction
- Performed pre-pour dimensional QC on concrete forms against engineering drawings using a tape measure and GD&T principles, approving pours before concrete placement and escalating out-of-tolerance conditions to engineering for disposition

HANDS-ON ENGINEERING PROJECTS

Go-Kart Rebuild and Mechanical Integration

[Personal Project](#)

- Rebuilt a high-performance go-kart (~45 mph) through full drivetrain, steering, braking, and suspension replacement and alignment
- Diagnosed and resolved 3+ drivetrain, braking, and steering failures through iterative mechanical troubleshooting, restoring consistent performance at ~45 mph

Additional Mechanical Projects

[Motorized Bicycle Conversion](#), [Tractor Restoration](#), [Electronics Repair](#)

- Integrated an internal combustion engine onto a bicycle frame with custom mounting solutions to maintain structural integrity and drivetrain alignment
- Restored a non-operational tractor: disassembled engine and drivetrain, refurbished key components, and reassembled to operational spec
- Performed component-level repair on smartphones including display, battery, and internal assemblies requiring fine tolerance handling and system diagnostics

ADDITIONAL EXPERIENCE

Server Assistant | 2022 – Present

[Mac's Chophouse](#) | Marietta, GA

- Managed 6–8 tables per shift at a high-volume 4-star restaurant serving up to 400 guests nightly at peak, personally supporting ~130 covers per shift while maintaining accuracy and service quality under pressure

TECHNICAL SKILLS

CAD: Autodesk Inventor (production-release experience), AutoCAD

Engineering: Mechanical systems, statics & dynamics, strength of materials, GD&T & dimensional tolerancing, numerical methods, diagnostics & troubleshooting, fabrication & assembly

Software: MATLAB, Python, Microsoft Suite, Google Suite, Adobe Suite

INTERESTS

Automotive systems & maintenance, mechanical restoration, aerospace engineering, aviation, weight training, violin & guitar
